Feature Show

Our high-quality visual productions are the anchor point for the mind-blowing, multi-sensory experiences we create.

On-site/Remote Filming

We offer the option to work remotely or on site.

Challenges Resources

We build STEM, Creative, Story and Game challenges to engage students deeper in learning.

Slideshow

A comprehensive slideshow that gathers all the theory the teachers need to go deeper.

Inquiry Guide

A guide to support inquiry prior to, during and even after the Live it show for project based learning.

Career Pathways

Short videos that explore unconventional or unknown careers and include an expert's own personal story of how they got there.

Indigenous Perspectives

Whenever possible we include and integrate Indigenous perspectives in our Feature Show and Slideshow resource. This is a supplemental video that provides more time and space for Indigenous experts to share insights, traditional knowledge and connections to other related topics.

Deep Dive

For those who are passionate about a topic, our Deep Dive videos appear in the Explore section of a program and go in-depth with experts.

Live Q/A with Experts

We invite experts to answer live kids questions on our platform on launch day.

Youth Development Program

This immersive program offers a dynamic blend of storytelling, cultural learning, community engagement, and environmental awareness, providing the youth with invaluable experiences and skills for their personal and professional growth.
